

Compilation of Recyclers
In
The State of Ohio

Toledo, OH 43606

August 2007

Abstract

This report presents a list of recyclers in and surrounding the state of Ohio. The name and address of all the recyclers in this state along with their contact information and associated web pages are listed in the tabular format. The list is segregated based on the product of recycling companies accept. There are total ten lists of companies accepting materials like glass, plastic, rubber, chemicals, fluorescent lamps, electronic equipments, mercury etc. A comprehensive list of recyclers available in each county and recyclers accepting general recycling material is also provided. In all more than 100 recyclers with few repetitions are listed in the report.

CHAPTER 1

INTRODUCTION

Recycling is the reprocessing of materials into new products. Recycling prevents useful material resources being wasted, reduces the consumption of raw materials and reduces energy usage, and hence greenhouse gas emissions, compared to virgin production [1]. Recycling is a key concept of modern waste management and is the third component of the waste hierarchy.

Recyclable materials, also called "recyclables" or "recyclates", may originate from a wide range of sources including the home and industry. They include glass, paper, aluminium, asphalt, iron, textiles and plastics. Biodegradable waste, such as food waste or garden waste, is also recyclable with the assistance of microorganisms through composting or anaerobic digestion.

Recyclates need to be sorted and separated into material types. Contamination of the recyclates with other materials must be prevented to increase the recyclates value and facilitate easier reprocessing for the ultimate recycling facility. This sorting can be performed either by the producer of the waste or within semi or fully-automated materials recovery facilities.

Recycling has been a common practice throughout human history. In pre-industrial times, scrap made of bronze and other precious metals was collected in Europe and melted down for perpetual reuse, and in Britain dust and ash from wood and coal fires was down cycled as a base material in brickmaking. The main driver for these types of recycling was the economic advantage of obtaining recycled feedstock instead of

acquiring virgin material, as well as a lack of public waste removal in ever more-populated sites.

Paper recycling began in Britain in 1921, when the British Waste Paper Association was established to encourage trade in waste paper recycling. Resource shortages caused by the world wars, and other such world changing occurrences greatly encouraged recycling. Massive government promotion campaigns were carried out in World War II in every country involved in the war, urging citizens to donate metals and conserve fiber, as a matter of significant patriotic importance.

In the USA, the next big investment in recycling occurred in the 1970s, due to rising energy costs (recycling aluminium uses only 5% of the energy required by virgin production; glass, paper and metals have less dramatic but very significant energy savings when recycled feedstock is used). The passage of the Clean Water Act of 1977 in the USA created strong demand for bleached paper (office paper whose fiber has already been bleached white increased in value as water effluent became more expensive).

One event that initiated recycling efforts occurred in 1989 when the city of Berkeley, California, banned the use of polystyrene packaging for keeping McDonald's hamburgers warm. One effect of this ban was to raise the shiza of management at Dow Chemical, the world's largest manufacturer of polystyrene, which led to the first major effort to show that plastics can be recycled. By 1999, there were 1,677 companies in the USA alone involved in the post-consumer plastics recycling business.

One of the main benefits of recycling comes from reducing the amount of new material required. In theory, recycling allows a material to be continually reused for the

same purpose, and in many cases this theory holds true, most notably in the recycling of metals and glass.

Since fewer raw materials are required, recycling creates further benefits for materials where cost of the initial extraction or production is high—either economically, socially or environmentally. The recycling of aluminium, for example, saves 95% of the CO₂ emissions—an environmentally harmful greenhouse gas, compared to refining new metal.

Concerns about limited resources such as raw materials and land space for disposal of waste have increased the importance of recycling. However maximum environmental benefit is gained by reducing the amount of waste produced, and reusing items in their current form, for example refilling bottles. All recycling techniques consume energy, for transportation and processing, and some also use considerable amounts of water. Both of these resources have an environmental impact which is why campaigners use the slogan "Reduce, Reuse, Recycle" to indicate the preferred order for waste management in the waste hierarchy.

Paper can only be recycled a finite number of times due to the shortening of paper fibers making the material less versatile. Often it will be mixed with a quantity of virgin material. This is referred to as *down cycling*. This does not however exclude the material from being used in other processes such as composting or anaerobic digestion, where further value can be extracted from the material in the form of compost or biogas.

There may also be drawbacks with the collection methods associated with recycling. Increasing collections of separated wastes adds to vehicle movements and the production of carbon dioxide. This may be negated however by centralized facilities such

as some advanced material recovery facilities of mechanical biological treatment systems for the separation of mixed wastes.

The purpose of this report is to present a list of recyclers in Ohio. The list is grouped according to the recycling products and companies accept. Also the brief list of recyclers distributed county wise.

CHAPTER 2

LIST OF RECYCLERS IN OHIO

An effort is made to enlist the recyclers in the state of Ohio with respect to there specialty recycling material

a. Glass recyclers:

Name of the company	URL /address of the company
Balcan engineering	http://www.lampdisposal.com/index.php
Eastern Environmental Technologies, Inc	47 Purdy Avenue Port Chester, NY 10573
Glassco Recycling Ltd	Glassco Recycling Ltd, 22 South William Street, Dublin 2
Dlubak Glass Company	11567 County Highway 110 Upper Sandusky, Oh 43351 PH 419-294-4466
Environmental Protective Services	http://www.enviroprotective.com/recyprob.html
Rumpke	http://www.rumpke.com/default.asp
Mercury Technologies of Minnesota	http://mercurytechnologies-mn.com/index.html
Glass compactor	http://www.glasscompactor.com/index.html
THE DONCO FAMILY OF RECYCLING COMPANIES	737 North Michigan Ave. Suite 1450, Olympia Center, Chicago, IL 60611, Ph 312-337-7822, Fax 312-337-7891
AERC recycling solutions Strategic Materials	http://www.envirolights.com/ 2323 West Third Street Cleveland, OH 44113 Ph: (216) 241-4450
VIKOZ ENTERPRISES INC	http://www.vikoz.com/home.html

Table 2.1 Glass Recyclers [2]

b. Plastic recyclers:

Name of the company	Address/ URL of the company
ReGen Polymers	Whitmore Lake, MI (Serving Ohio – Northern) http://www.regenpolymers.com/
Brunswick Metals Co	3812 Pearl Rd. Medina, OH 44256-0702 Phone: 330-723-7810

Kirsch Services, Inc	41 Oakwood Dr., P.O. Box 703 Westfield Center, OH 44251 Phone: 330-769-1340
Recycled Plastic Technology, Inc	450 Hickory St. Akron, OH 44303 Phone: 330-535-7375
Polynew	P.O. Box 318 Baltic, OH 43804-9705 Phone: 330-897-3202
CAPCO Recycling, Inc	44054 Heck Rd., P.O. Box 4 Columbiana, OH 44408 Phone: 330-482-4686
M & W Plastic Recycling, Ltd.	210 N. Center St., P.O. Box 173 West Lafayette, OH 43845 Phone: 740-545-0181
McDunnough, Inc.	10732 Plaza Dr. Whitmore Lake, MI 48189 Phone: 734-449-4008

Table 2.2 Plastic Recyclers [2][3]

C. Rubber recyclers:

Name of the company	Address/ URL of the company
American rubber tech.	http://www.americanrubber.com/index.html
Common Ground Recycling, Inc	http://www.commongroundrecycling.com/
Davisrubbercompany.com	http://davisrubbercompany.com
Komar Industries, Inc.	4425 Marketing Place Groveport, OH 43125-9556 Phone: 614-836-2366
Procex Ltd	880 Cherry St. Kent, OH 44240 Phone: 800-486-7053

Table 2.3 Rubber recyclers [2][3]

d. General recycling companies:

Name of the company	Waste product	Address/ URL of the company
Oil Service, Inc	Oil, metal	2899 Grand Ave. Pittsburgh, PA 15225 Phone: 412-771-6950
Chemtron Corp.	All type of waste	35850 Schneider Ct. Avon, OH 44011
Envirite, Inc.	All type of waste	2050 Central Ave. S.E. Canton, OH 44707

		Phone: 330-456-6238
Zampogna, Inc	All type of waste	715 Ewing St. Arnold, PA 15068-2141 Phone: 724-335-1471
River Metals Recycling LLC	Metals	1220 Licking Pike Newport, KY 41071 Phone: 859-291-5509
Procex Ltd.	Metals	880 Cherry St. Kent, OH 44240 Phone: 800-486-7053
Stalloy Metals, Inc.	Metals	17718 S. Waterloo Rd. Cleveland, OH 44119 Phone: 216-531-8333
Schumann, I. & Co.	Metals	22500 Alexander Rd., P.O. Box 46271 Bedford, OH 44146
Philip Services	metals	4250-T E. 68th St. Cleveland, OH 44105-5733 Phone: 216-341-3400

Table 2.4 General Recycling companies [2][3][4]

e. Chemical recycling and disposal companies:

Name of the company	Address/ URL of the company
McCutcheon Enterprises, Inc.	250 Park Rd. Apollo, PA 15613-8730 Phone: 724-568-3623
Hukill Chemical Corp.	7013 Krick Rd. Cleveland, OH 44145 Phone: 440-232-9400
Smurfit-Stone	9960 Alliance Rd. Cincinnati, OH 45242 Phone: 513-745-2400
CBG Biotech	2211 Lake Club Dr. Columbus, OH 43232 Phone: 614-863-1560,
Chemtron Corp	35850 Schneider Ct. Avon, OH 44011 Phone: 440-937-6348
Envirite, Inc.	2050 Central Ave. S.E. Canton, OH 44707 Phone: 330-456-6238

Table 2.9 Electronics and Fluorescent lamp recyclers [6]

j. Recycler search engine:

www.earth911.org is a comprehensive website which provides with a detailed database of recyclers available in the United States. The site is updates with latest database. The search can be based on the type of recycler, area or the city and recycling material etc.

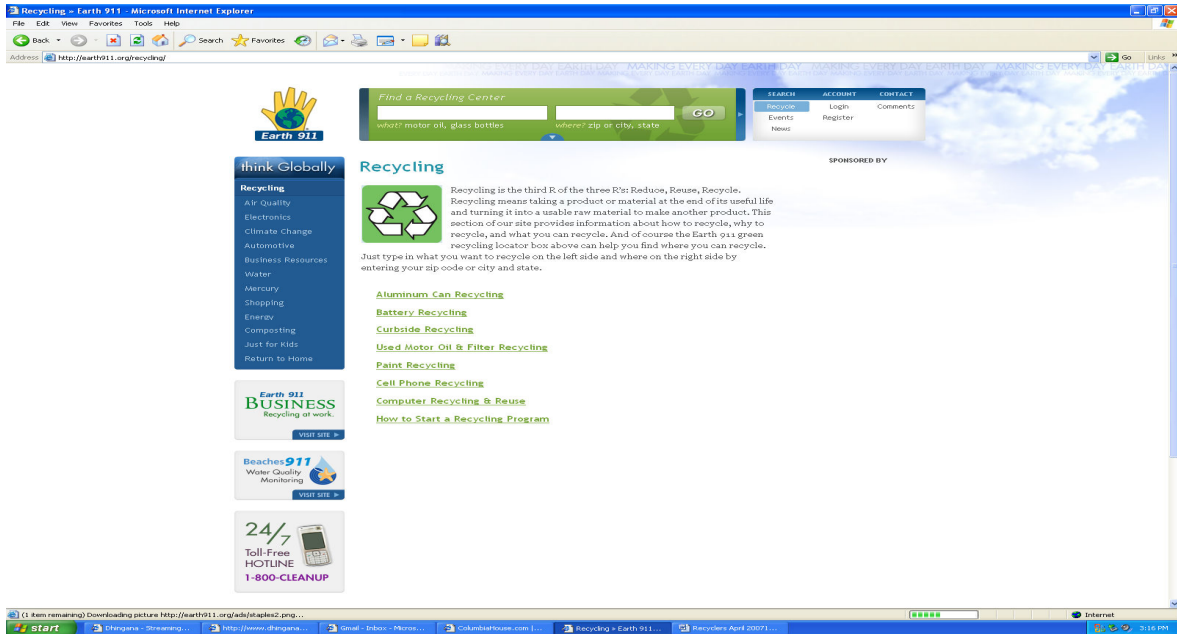

Fig. 1 Screen shot of www.earth911.org recycler search engine

CHAPTER 3

CONCLUSION

Following conclusions can be found in the report

- The list of recyclers in Ohio and surrounding areas is prepared.
- The recyclers are group based on the product they accept for recycling e.g. glass, plastic, rubber, Cardboard, chemicals and electronics.
- A brief list of county wise recyclers is also prepared.
- An online search engine is also listed for searching recyclers online. The search can be based on recycling material or area or the city in the proximity.
