Engineering Distinguished Alumnus inducted into the Plastic Pioneers Association

College of Engineering Distinguished Alumnus, Mr. Scott Steele (ChemE, ’79) of Plastics Technologies, Inc., Holland, Ohio, will be inducted into the Plastic Pioneers Association on March 31 at a ceremony in Orlando that will precede the NPE.

Established in 1948 as an affiliate organization to SPI, The Plastics Pioneers Association, Inc. is a group of men and women whose primary mission is to further the growth of the plastics industry by supporting and encouraging the education and training of students destined for careers in plastics technology and engineering.

Over the years, The Plastic Pioneers Association has recognized individuals who have themselves achieved in the fields of plastics and polymer science and the association continues to promote the study of plastics and polymer science by providing scholarships to deserving students who are enrolled in programs which will lead to careers in plastics and/or polymer science, engineering, technology, education, marketing and sales, or management in the Plastics Industry.

Congratulations, Scott, for your contributions to the Plastics Industry and for your commitment to educating future leaders for our industry.

Scott Steele
