Student Spotlight

Student Organizations

A $300 grant was awarded to the University of Toledo student chapter of Engineers Without Borders. This is a non-profit organization comprised of students, faculty, and professional mentors dedicated to providing engineering solutions to communities across the globe. The University of Toledo student chapter is currently involved in the design of a pedestrian bridge for the community of Los Sanchez, Honduras.

Los Sanchez is located in a rural, mountainous region of southwest Honduras. The community is separated from the main road that leads to nearby cities by the Rio Buscagua. During the rainy season, the river is impassable and the community is isolated from medical treatment, markets, schools, and employment opportunities. The work that the University of Toledo students are doing is vital to helping this community, and provides a positive impact on the students involved as well.
