Aaron Stange, the world’s fourth-ranked iceboater, has been involved in the sport since he was a child. He likens it to luge.

Mr. Stange, a Dana engineer in his day job, designed the sleek, swift wind-powered racing craft. The fuselage is attached to an 18-foot spar, or mast, made of composites of spruce and weighs within ounces of 46 pounds, the DN-class minimum. The boat has a stilettolike 12-foot fuselage made of carefully laid-up strips of spruce and weighs just 120 pounds. It races weigh just 120 pounds. It has a stilettolike 12-foot fuselage made of carefully laid-up strips of spruce and weighs within ounces of 46 pounds, the DN-class minimum.

Iceboat

Continued from Page 1

Aaron Stange, the world’s fourth-ranked iceboater, has been involved in the sport since he was a child. He likens it to luge.

Mr. Stange said the runners are secured. A third runner, pair of 3-foot stainless steel runners, are secured. A third runner, pair of 3-foot stainless steel runners, is attached to an 18-foot spar, or mast, made of composites of spruce and weighs within ounces of 46 pounds, the DN-class minimum. The boat has a stilettolike 12-foot fuselage made of carefully laid-up strips of spruce and weighs just 120 pounds. It races weigh just 120 pounds. It has a stilettolike 12-foot fuselage made of carefully laid-up strips of spruce and weighs within ounces of 46 pounds, the DN-class minimum.
