

Soma Shekara Sreenadh Reddy Depuru, a UT College of Engineering graduate student (EECS), entered the Finals of the 2009 Student Essay Competition by Earthzine. His essay is titled "Sustainability through Earth Observation and Engineering". Sreenadh is working with **Dr. L. Wang and Dr. V. Devabhaktuni**.

Earthzine's 2009 student essay contest – Sustainability through Earth Observation and Engineering – challenged students around the world to craft essays that creatively examine the benefits that new technological systems in Earth observation and engineering can have on sustainability. A panel of judges have chosen the best seven essays for publication and the student authors are now fielding questions regarding their ideas. We welcome you to read their work and join this truly global conversation.

Please take a few minutes to read his essay and provide your comments at [Link](#).
