

Project 1 *Essay Assignment*
Object Oriented Programming
Due Thursday February 8, in class 60 points

This assignment is to write an essay about the video “Future Video” posted on the class website. Your object is to critique the author’s claims. This assignment can be done alone or as a pair.

The essay must be your own writing. It is an opportunity to show that you are able
to produce good technical writing
to evaluate technical material
to form and express your own opinion about the author’s claims.

Try to support your view either by a convincing argument, a critique of the author’s key points, or by suitably precise references.

Limited citations are permitted, provided that the citation is clearly marked as such, is correct, is relevant, and is to-the-point.

Document format is text (e.g. MS Word), single spaced. Line length 6 ½ inches. NO cover page. Short paragraphs, bulleted lists, diagrams, and tables are encouraged.

Length: 2 to 3 (maximum) pages, including references.

Grading: Format and logic are both graded. A submission that is hard to read on either count may get a grade of 0.
