

National Institute of Technology (NIT), Kurukshetra, India, has signed an MoU with the University of Toledo to co-operate in terms of academics and research (*e.g.* faculty exchange). The MoU encourages faculty, knowledge, and student exchange between both the parties. Given the above context, Dr. A. Kumar (Chair, Civil Engineering) and Dr. V. Devabhaktuni (Associate Professor, EECS Department), both from the University of Toledo, interacted with Department Chairs, Faculty, Postgraduate, and Undergraduate Students of Civil, Computer, ECE, and Electrical Departments of NIT. Drs. Kumar and Devabhaktuni held several meetings coordinated by the Center for Continuing Education & External Collaboration (CCEEC) of NIT during October 14-15, 2009. One of the several objectives is “graduate student recruitment”!
