

## UT technology transfer success continues in 2009

By Jeffrey Romagni : Thursday, April 30th, 2009 <http://utnews.utoledo.edu/index.php/category/research>

The University of Toledo has been committed to becoming a national leader in the area of technology transfer. Each year, UT continues to increase activity in tech transfer, and 2009 is predicted to have the greatest success.

With the help of Samuel Giles, patent licensing associate in the Office of Research Development, right seated, Jack Harley of the JWH Group Inc., left, signed an exclusive license agreement for a gas sensor technology developed by Dr. Abdul-Majeed Azad from the UT College of Engineering. On hand for the signing were, from left, Stephen Snider, director of technology licensing and contracts, Dr. Dan Kory, associate vice president for technology transfer, and Mark Fox, patent-technology associate.
