E-CORE Submission Selected as Best Poster by the Orthopedic Research Society (ORS)

The Orthopedic Research Society (ORS) has selected one of our abstract submissions as the preeminent poster in the Knee category. It will be displayed at the American Academy of Orthopaedic Surgeons Annual Meeting in San Francisco, California February 7 – February 11, 2012 at the Moscone West Convention Center.

According to ECORE Co-Director, Vijay Goel, PhD, “the ORS receives 1500+ abstract submissions, so it is indeed an honor for our work to be among one of the top-scored entries. This work is based on the ongoing NIH-funded grant that we retain with Ohio State University.”

Congratulations to all those involved for their dedication and hard work on this project.
